Jairo Enrique Diaz

Project Manager | Enterprise Software Implementation | Hybrid Agile & Traditional Delivery | PMP · PMI-ACP

Bogotá, Colombia | +57 310 790 1197 | jairodiaz@yahoo.com

PROFESSIONAL SUMMARY

PMP and PMI-ACP certified Project Manager with 15+ years leading large, complex, enterprise-level software implementation projects for clients across North America and Latin America. Skilled at blending traditional project management with Agile and SAFe practices in the right proportions, providing the balance of agility and predictability that mission-critical programs require.

Manages the full project lifecycle, from scoping, cost estimation, scheduling and resourcing through technical solution design, quality control and validation, end user training and project closure. Leads multi-function teams of developers, DevOps, business analysts and QA personnel, across up to 5 Scrum teams (25 people) and multiple countries, while owning project governance, budgeting, risk and issue management, and stakeholder communications.

Strong data background (data requirements, data consolidation, Azure data warehouse migration, BI and reporting) and experience in vendor professional services and client-facing implementations across financial services, aviation, telecommunications and pharmaceutical ERP. MBA in Project Management and Electronic Engineer; fluent English, native Spanish, elementary Portuguese.

CORE COMPETENCIES

- **Project Management:** Full project lifecycle, scoping, cost estimation, scheduling, resourcing, project closure, program management
- **Delivery Methods:** Hybrid (traditional + Agile), Scrum, SAFe, SDLC, release and roadmap planning, Agile process improvement
- **Governance & Finance:** Project governance, budgeting, financial oversight, business case and TCO, procurement and cost control, risk and issue management
- **People & Stakeholders:** Multi-function team leadership (Developers, Business Analysts, QA), coaching, stakeholder communications, customer expectation management, progress reporting
- **Data & Architecture:** Data requirements, data consolidation, data warehouse, BI and reporting (Tableau), Databricks/Synapse, business process management, business architecture and systems architecture (TOGAF fundamentals)
- **Technology & Tools:** Azure, GCP, AWS fundamentals, DevOps and CI/CD, SAP SD (O2C), RPA, SQL (basic queries), JIRA, Azure DevOps, Confluence, MS Project, Advanced Excel

PROFESSIONAL EXPERIENCE

Agile Project Manager | Endava

06/2021 – 10/2026 | Software engineering services for North American clients

- Lead and manage enterprise-level software projects with multi-function agile teams (typically around 10 team members) integrating their work with DevOps, architecture and client business teams.
- Led Data and Backend delivery (C# development teams) for a US-based financial services client, migrating and modernizing investment management applications to Azure cloud environments.
- Managed delivery of greenfield web and mobile platforms within cloud-native modernization initiatives (GCP), owning scope, schedule, dependencies, risks and execution readiness across multiple technical workstreams.
- Organize and lead weekly sprint, status and working meetings and prepare progress reports, removing roadblocks and holding teams accountable for their commitments.
- Own project governance, financial oversight and risk mitigation, translating technical risks and trade-offs into business terms to manage customer expectations and correct deviations from plan.
- Maintain delivery documentation and end user training materials for technical and non-technical stakeholders, improving onboarding and reducing repeat support requests.

Key achievements

- Recognized by the client as a top-performing Agile Project Manager/Scrum Master for leadership and delivery execution.
- Increased stakeholder satisfaction scores from 5.0 to 8.7 through improved delivery transparency and predictability.
- Maintained project gross margins above 30% during FY22 and FY23.

Technical Project Manager | TCS, on behalf of Avianca Holding

01/2021 – 06/2021 | Aviation

- Managed migration of a large-scale enterprise Data Warehouse to Azure, covering data requirements, data consolidation and a new reporting solution that improved data reliability for operations.
- Co-developed the business case and Total Cost of Ownership (TCO) model with Microsoft consultants, supporting cost estimation and securing project funding.
- Led delivery planning and roadmaps during due diligence, blending upfront planning with Agile delivery.
- Led ML/AI proofs of concept for aeronautics process improvement built on Databricks and Synapse.
- Performed quality control and validation of report data with business teams, troubleshooting reporting issues and escalating root causes to data engineering.

Project Lead / Scrum Master | TCS

12/2018 – 01/2021 | Telecommunications

- Led a Big Data and Tableau program across multiple agile teams (5 Scrum teams, 25 people), driving adoption through hypercare and end user training.
- Coordinated distributed engineering teams across Colombia and India.
- As Scrum master, delivered RPA solutions supporting telecom business process optimization.
- Partnered with Product Owners and PMO to align priorities, and monitored KPIs, risks and financials to improve predictability.

e-Invoicing Stream Lead, SAP SD | TCS, on behalf of GlaxoSmithKline (GSK)

07/2017 – 10/2018 | Pharmaceutical, multi-country ERP

- Led a full-lifecycle, multi-country e-Invoicing project integrating SAP O2C (SD module) for Chile, Peru, Ecuador and Colombia.
- Gathered business requirements and mapped business processes against each country's tax regulations, designing tailored solutions with project architects.
- Defined the project plan, resourcing, risks, issues and mitigation plans, ensuring commitments and timelines were met.
- Managed project procurement, budgeting, cost tracking and control.

Key achievements

- Delivered go-live on schedule despite multiple regulatory changes in Colombia and Peru.

Senior Project Lead | Comverse / Mavenir

06/2011 – 12/2016 | Telecom software vendor, Professional Services

- Led client implementations and deployments of Value-Added Services (VAS) platforms for telecom operators across Latin America and the Caribbean, ensuring on-time, high-quality delivery.
- Applied project management practices for schedule, resources, risk and issue resolution, collaborating with Sales, R&D and clients to scope solutions correctly.

EDUCATION

- **MBA, Project Management:** Universidad Arturo Prat, Chile, 2017
- **Master in Electronic Engineering, Telecommunications:** Universidad de los Andes, Bogotá, 2008
- **Electronic Engineer:** Pontificia Universidad Javeriana, Colombia, 1998

CERTIFICATIONS

- PMP #1537295 | PMI-ACP #3450231 | SAFe Agilist #94745562-8285 | ITIL Foundation v3 | Scrum Foundation
- **Training:** DevOps & Cloud (MIT); AWS Cloud Practitioner; Vertex AI for GCP; Azure Databricks & Synapse; TOGAF
